EDUCATION

New York University, New York, NY — Sept 2025 - Present
MPS, Interactive Telecommunications Program · GPA: 4.00

Academy of Art University, San Francisco, CA — September 2020 - May 2022
Bachelor of Arts, Animation And Visual Effects · GPA: 3.81 · Spring Show Award

WORK EXPERIENCE

25 Madison | Product Design Intern, New York, NY — September - Present

- Supported product design across venture-studio incubations, producing user flows, UI explorations, and interactive prototypes.
- Contributed to early-stage product discovery through workflow mapping, system thinking, and testable design artifacts.
- Collaborated with designers, associates, founders and engineers to iterate on complex B2B SaaS workflows.

Talkspace | Product Design Intern, New York, NY — June - August 2026

- Built an AI-assisted design workflow that generates production-ready components from plain-language prompts against Talkspace's live design system — then designed every hi-fi screen for a real product project as code, without opening Figma.
- Owned end-to-end product design for a member-facing feature in the onboarding flow, from PRD through hi-fi; scoped the MVP down after a data audit invalidated the richer direction, validated it with 18 participants, and led the cross-functional design review with PM, engineering, and data research.
- Audited the Talkspace design system for AI readiness, documenting token versioning, naming mismatches, and coverage gaps surfaced while designing, and updating component documentation to close them.

MindFlow | Product Design Intern, New York, NY — February 2026 - May 2026

- Produced multiple concepts and rapidly prototyped in Figma, iterating from wireframes to pixel perfect high fidelity UI through fast feedback cycles
- Collaborated cross functionally with engineers and product stakeholders, producing build ready specs and refining interaction details through review cycles

Company3 / Method Inc. | VFX Compositor, New York, NY — June 2022 - May 2025

- Delivered pixel perfect visual work for short form and long form video across feature films and episodic TV, building deep fluency in video craft, motion, and mobile ready content formats
- Collaborated cross functionally with artists, supervisors, and production teams in high pressure, fast iteration environments that celebrated efficiency and driving impact

UX PROJECTS

Control My Laptop | Real-Time Control Interface | 2026

- Rapidly prototyped using Claude Code, generating multiple concepts and iterating on pixel perfect interaction details Designed real time state feedback (loading, latency, errors, responsiveness) to keep the experience predictable and trustworthy as the system updates live
- Iterated user flows through feedback and critique, refining micro interactions to make system changes legible and controllable

Weave | Enterprise Workflow Tool | 2025

- Designed end to end user flows and dashboards in Figma, translating business requirements and data into clear decision supporting UI
- Defined reusable UI patterns and system states across modules, iterating through critique and usability testing to improve consistency and scalability

SKILLS

- **UX Design** | UX/UI design · Interaction design · Rapid prototyping · Design systems · User research · User flows · Wireframes · High fidelity UI · Pixel perfect execution · Data driven iteration · Design critique
- **Tools** | Figma · FigJam · Adobe Creative Suite (After Effects, Photoshop, Illustrator) · HTML · CSS · AI assisted design workflows (Claude Code, Claude Design, Cursor, Figma Make)
